

# FRASER RIVER SPORTFISHING ALLIANCE

*SALMON FOR ALL*

## To whom it may concern,

The mandate of the Fraser River Sportfishing Alliance is to entrench and preserve the Fraser River recreational salmon fishery for future generations. This heritage fishery has spawned many of the current champions of the resource who developed a passion for fishing and fish by learning as a child to cast a worm on the banks of the Fraser River.

---

**We respect conservation and we respect the constitutional priorities of First Nations.**

**We will work with other sectors in preserving fish stocks and expanding opportunities.**

**We will work with other groups in providing safe respectful fisheries on the Fraser River and tributaries.**

**We will work with all government fish managers toward preserving fish stocks and retaining angler opportunities.**

**We will demand that our rights as Canadian citizens are recognized.**

---
